

bicar[®]Z

for ruminants

The best buffer and source of sodium

SOLVAY

asking more from chemistry[®]

Main benefits and recommended doses

What is Bicar[®]Z?

Bicar[®]Z is the Solvay's brand for animal feed sodium bicarbonate. Bicar[®]Z is a feed material which is great buffer and a source of sodium (and bicarbonate) without chlorine.

How much?

Milk cows during lactation: 250 grams per cow a day
Young fattening bovine: 150 grams per day continuously.
Dairy goats, Dairy ewe: 20 grams per day continuously.
Fattening lambs: 1% of the feed taken in.

Why?

There are lots of reasons to use Bicar[®]Z.

- > Bicar[®]Z is a well known buffer which helps to prevent acidosis.
- > Participate to the regulation of ruminal pH
- > It's a source of sodium without chlorine
- > It's essential during heat stress (temperature >22°C)
- > It improves the efficiency of the ration (better digestibility)
- > For dairy cows: trials show an increase of milk production
- > For cattle: trials show an improvement of the finishing.
